EMOTIVE SOFTWARE
ERP

SALES@EMOTIVESOFTWARE.COM

BENEFITS:

Improved Collection Efficiency: Automating payment reminders, starter-interrupt commands, and starter-enable commands streamlines collection services, reducing delinquencies and defaults.

Enhanced Compliance: The integration ensures regulatory compliance by treating all customers similarly and providing automated notifications under finance contracts, minimizing potential legal issues.

Increased Productivity: By eliminating manual data entry and duplicate entries, collections managers can focus on high-priority tasks, improving overall productivity.

Better Customer Service: GPS automation provides customers with accurate updates on vehicle status, improving satisfaction and loyalty.

Real-time GPS Device Information: Mutual customers can access real-time GPS data, enabling informed decisions and proactive risk management.

Unified Workflow Management: Integrating Ituran GPS with DMS systems allows dealerships to manage their vehicle finance workflow from a single screen, enhancing operational efficiency.
